

Marc Gilbert

Atlassian Consultant and Linux System Architect

Marc is a system architect who has a deep understanding of linux systems and is highly skilled at debugging problems and supporting customers.

In his 11 years of experience in the hosting industry, he specialized on all things Atlassian and can support you with high-level process consulting as well as the operational aspects of running Atlassian products.

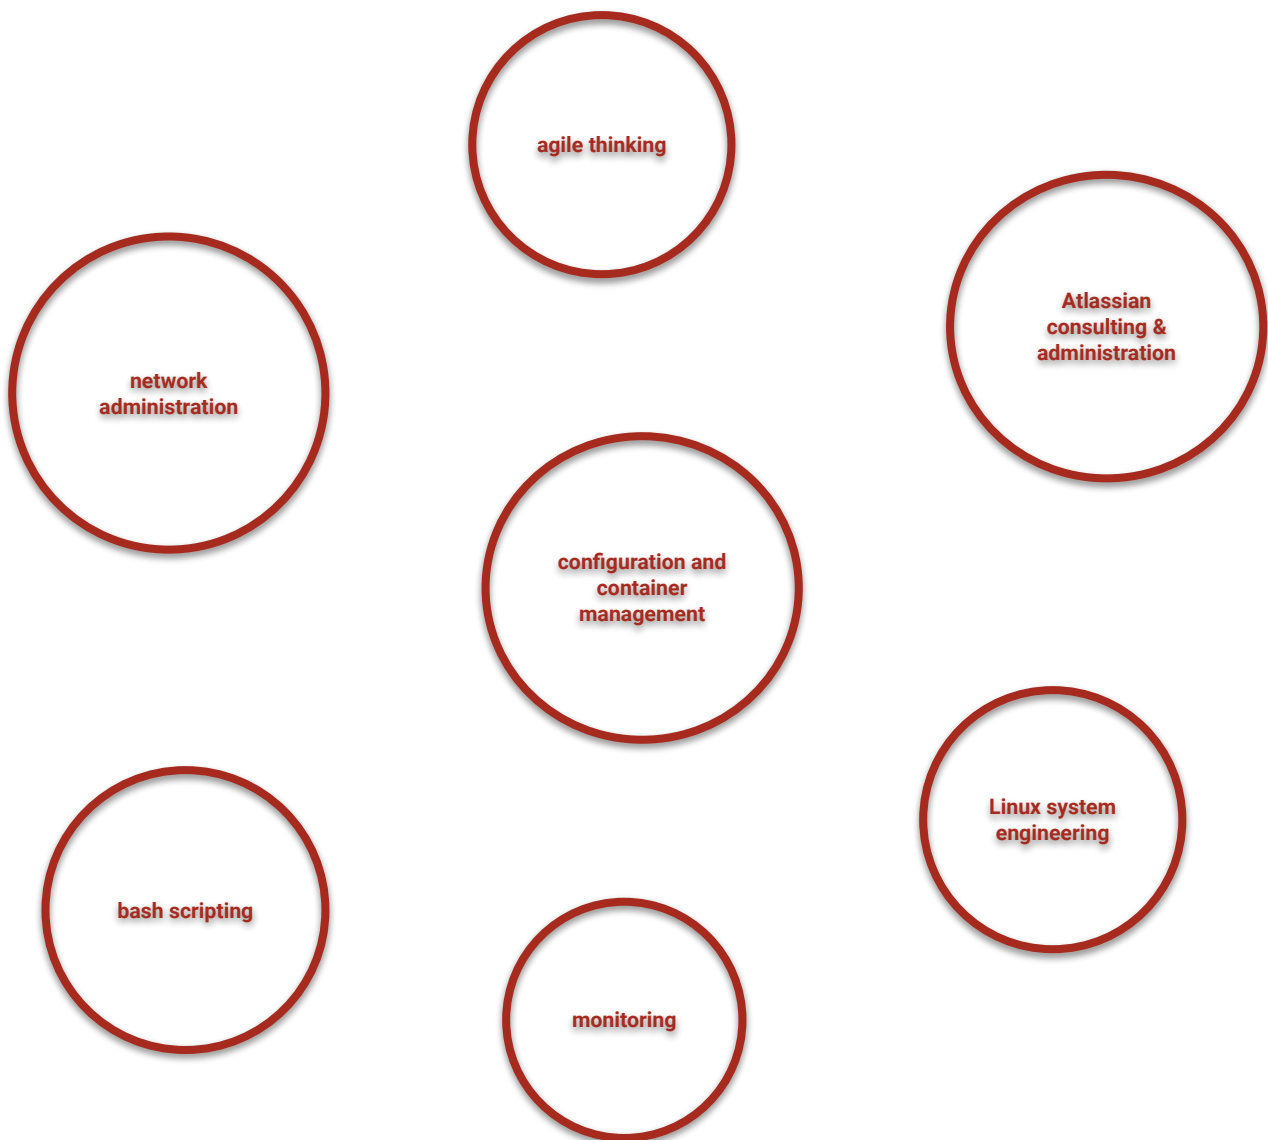

Marc likes to collaborate with customers in an agile way to ensure trust and transparency from the beginning on.
